Very, very inside stuff

7. **William C. Sullivan**, the controversal former assistant director of the FBI—who directed **J. Edgar Hoover's** harassment of civil rights leader **Dr. Martin Luther King, Jr.**, and then later disclosed his actions to a Senate investigating committee and publicly questioned Hoover's mental stability—will continue to be a character of public controversy even after death. Actor **Clu Gallagher** will play the part of Sullivan in a movie now being filmed. The picture, entitled KING, co-stars **Paul Winfield** as the black minister who was assassinated in Memphis. Sullivan was shot to death in November in a hunting tragedy that New Hampshire officials have labeled accidential. The shooting followed by six months a mysterious fire which destroyed many of the files of the man who was the third most powerful member of the FBI while heading its counter intelligence program...conspiratorial theorists take note.
